Phantom Partnership Agreement –
Guided Team Charter (Extended Version)

For TIE Master's teams – alignment, commitment and clarity

1. Our Team and Project

Team Name: _____Edgame_____
Project Title: _____Edgame_____

A. Mission / Purpose (Why do we exist as a team?)

Our purpose is to empower tutors, academies, and schools with an easy, scalable platform that turns their own content into rich, AI-powered, multiplayer learning games. We aim to close the engagement gap, reduce dropout, boost learning outcomes, and give every educator the tools to deliver modern, interactive experiences that were previously accessible only to well-funded institutions.

Example: We aim to design an affordable and reliable air-quality sensor for schools in polluted cities.

B. Vision (What does success look like for us?) →

Success means demonstrating that tutors, academies, and schools can run fully gamified, AI-powered learning sessions using our platform with minimal onboarding — and proving measurable improvements in engagement, retention, and learning outcomes.

Success =

- A **working platform** with AI challenge generation + reusable game templates
- **Validated demand** across diverse verticals (English, chess, business, STEM, special needs, etc.)
- **Pilot partners** (schools, academies, institutions) using the platform weekly
- Clear metrics showing improved **engagement, scores, and retention**
- A **repeatable go-to-market motion** and paying early adopters

E*xample: Success means a tested prototype, validated customer need and clear path to funding or IP protection*

2. Our Norms, Working Principles and Red Flags

We agree to work according to these principles: Transparency, Respect, Accountability, Curiosity, Reliability, Adaptability.

A. Team-specific principles:

We commit to working with early and clear communication, documenting decisions as we go, moving fast and validating with real users, taking full ownership of our responsibilities, keeping solutions simple, respecting each other's and our users' time, staying curious and open to learning, supporting one another under pressure with positivity and humor, and giving honest, respectful feedback that helps us continuously improve as a team.

Example: Early communication, clear documentation, and humor under pressure.

B. Team Member Red Flags (behaviours that make collaboration hard):

Red flags include vague or inconsistent communication, missing deadlines without advance notice, avoiding accountability or ownership, making decisions privately instead of transparently, resisting feedback or learning, creating unnecessary complexity, showing disrespect for teammates' time, and repeatedly failing to follow through on agreed processes or commitments.

Before treating any behavior as a persistent red flag, the team commits to: (1) raising the concern directly and respectfully, (2) agreeing on clear expectations and next steps, and (3) documenting the discussion and follow-up. The goal is improvement, not blame.

Examples: missed deadlines without notice; decisions made outside meetings; lack of structure.

3. Motivations and Expectations

Each member writes their motivation and expected time commitment.

Member	Motivation	Weekly Time
Yousef Radwan	This has been my dream project for almost 4 years now, I am extremely committed to get this done and build something revolutionary	30hrs/week
Luis Murillo	I am fully committed to solving this problem and to building this project as a joint venture, where both founders actively shape the vision, strategy, and product. Regardless of any past inspiration, what we are now developing is something we are constructing together, with shared ownership and shared responsibility. My motivation comes from the opportunity to co-create a meaningful solution and to execute it with full dedication and clarity as equal partners.	20hrs/week

4. Team Roles and Competencies Mapping

Use the **Insights Colors** framework to describe your personal working style and complementarity.
(Optional color guide:)
- **Fiery Red** – action-oriented, decisive, direct.
- **Sunshine Yellow** – enthusiastic, creative, social.
- **Earth Green** – supportive, patient, empathetic.
- **Cool Blue** – analytical, precise, structured.

Role (Examples)	Name	Insights Color	Key Competencies / Experience	Main Responsibility (examples)
Project Lead	Yousef Radwan	Cool Blue, Earth Green	AI, web development, business	Follow up with the team, lead B2B sales meetings, develop AI sections of the platform
Operations & Market Lead	Luis Murillo	Cool Blue, Sunshine Yellow	Project management, operations, branding strategy, user research, value proposition	Lead operations and execution processes, coordinate workflow and timelines, manage user research & validation, drive branding and communication strategy.
Finance / Communication / Docs	Shared			Budget tracking and expense mapping. Preparing company material and documentation, keeping documentation organized.

Team Guardian (ensures rules followed): _____Yousef Radwan_____

---

5. Stakeholders and Advisors

List key external actors (PI, partner company, TTO, mentors …).

Stakeholder	Organization	Role / Contribution	Rights & Authority
N/A	N/A	N/A	N/A

6. Decision-Making and Escalation

Our team's decision process will work as follows:

Routine decisions (everyday tasks) will be made by:

Each member independently, using their judgment and ownership within their assigned area, as long as the decision is low-impact, does not involve financial or strategic changes, and is communicated to the other founder.

_____

Example: each responsible member decides within their area.

Operational decisions (team priorities, deadlines, tools) will be made by:

The team collectively during weekly meetings, with decisions finalized through majority alignment when needed.

_____

Example: decided by majority vote during weekly meeting.

Strategic decisions (direction, partnerships, major pivots) will be made by:

The full team through consensus after consulting our mentor for guidance.

_____

Example: full team consensus or after consulting mentor.

If we have disagreements, we will:

Document the disagreement, take a short pause to reflect, and consult our mentor for guidance and resolution if we cannot agree internally.

_____

Example: document the disagreement, pause 24 h, and consult our mentor if unresolved.

(Suggested good practice: record major decisions in meeting notes. Silence ≠ consent.

7. Accountability and Communication

Our communication and accountability norms will be:

Our communication and accountability norms will be regular weekly meetings, transparent progress updates through agreed communication channels , and a culture of constructive feedback, with a brief follow-up if someone misses a meeting without notice.

_____

Example: weekly meetings, shared task tracker, constructive feedback loops.

Suggested practice: Two missed meetings without notice → guardian checks in.

8. Intellectual Property and Resources

Our approach to managing IP and shared resources will be:

Our approach to managing IP and shared resources will be that any pre-existing IP declared stays with its original owner, and all new IP created together is shared as joint contribution.

_____

Examples: Pre-existing IP remains with the owner; new IP shared equally unless otherwise agreed; contributions documented.

If using external inputs (e.g., lab results, code, or partner data), we will:

If using external inputs, we will credit all sources properly, verify the IP or licensing status, and follow the relevant institutional or legal rules governing their use.

_____

Example: credit the source, confirm IP status, and follow KAUST TTO rules.

9. If We Create a Company

If our project becomes a venture, our approach will be:

Initial equity distribution will be:

Yousef Radwan with 10% effective immediately and 30% unlocked at the end of Semester 2 and another 30% at the end of the International Hubs phase, leading to a total of 70% (unlocked based on shared milestones).
Similarly, Luis Murillo with 10% effective immediately and 10% unlocked at the end of Semester 2 and another 10% at the end of the International Hubs phase, leading to a total of 30% (unlocked based on shared milestones).

Example: equal shares at start; revised based on contribution after 6 months.

We plan to re-evaluate ownership when:

Before incorporation, in the case of any funding opportunities, if any member decides to leave TIE before graduation, if any member is not fulfilling KPIs and expected milestones.

Example: before incorporation or funding.

10. KPIs and Balanced Scorecard Snapshot

Define the indicators you will use to track both **internal progress** and **external traction**.
You may adapt the table below or select your own key measures.

Perspective	Objective	Example Key Indicators	Target / Milestone	Responsible
Technology Development	Advance technical readiness	Prototype built and tested; TRL (Technology Readiness Level) reached; # of iterations or lab tests completed	TRL 4–6 by end of semester	Project Lead
Market Development	Build market validation and user insight	# of customer interviews; # of pilot users; MoUs or LOIs secured; partner engagement score	≥ 20 interviews, 1 pilot partner	All
Process & Execution	Deliver on milestones and teamwork discipline	Tasks completed on time; meeting attendance; internal communication quality	≥ 80 % tasks on track	Guardian (process facilitator only)
Learning & Growth	Develop team skills and entrepreneurial mindset	Workshops attended; reflection sessions; mentor feedback	weekly mentor reviews, attend any relevant KAUST seminars	All
Financial & Resources	Manage resources effectively and transparently	Budget variance; grant usage; sponsorships secured	Variance ≤ 10 %	All

Teams may add or replace indicators that better capture their venture's progress, such as sustainability metrics, societal impact, or commercialization readiness.

---

11. Exit and Continuity

Leaving a team is **not a standard option** and must be approved by **TIE Program Management**. It should only happen in exceptional and well-documented circumstances.

If an exit is proposed, the process will include:
1. A written explanation of reasons for leaving.
2. Discussion with the team and faculty mentor.
3. Final approval by TIE Program Management before any change is valid.

If approved, the exiting member must:
→ Provide full handover of materials and uphold confidentiality.

Teams should focus on finding constructive solutions before considering an exit.

---

12. Review and Growth

We will review this agreement at least twice (after 1 month and mid-program).
Next planned review dates:

- End of Semester 2
- End of International Hubs period

Questions we will ask ourselves:
- What's working well?
- What's creating friction?
- What needs adjusting?

---

13. Core Team Signatures

Name	Signature	Date
Yousef Radwan		9/12/2025
Luis Murillo		10/12/2025

---

14. Stakeholder Signatures

Name	Organization	Signature	Date
